

Pro Series - Pipe Dock

The strongest pipe dock in the water

Whitewater Docks- Pro Series floating docks are the toughest pipe docks on the market with a unique floatation framework that provides superior buoyancy, strength and stability.

Floating Docks are the best choice for deep water or fluctuating water levels. One of the benefits of the floating dock is that it is always at a consistent height above the water, great when mooring a boat.

Whitewater floating dock platforms are the ultimate in industrial quality, premium docks. Individual Whitewater floating dock units can be custom manufactured in lengths up to 30' and widths up to 12' or more.

Featuring industrial grade construction, they can be utilized as a single unit or arranged into various multi-unit configurations to suit a multitude of waterfront scenarios ranging from **simple recreational layouts to full scale marina systems.**

Wood framing consists of 4" x 4" pressure treated spruce framing. 2" x 10" skirt and 2" x 6" decking. Included in complete docks heavy duty galvanized inside corner hardware.
