DIY : Pipe Only

For the 'true DIY' type, these are 14" or 18" diameter pipes. Build your own dock with Eco-Friendly HDPE Pontoons. Our HDPE Plastic Pontoons are able to be left in the water over the winter in most locations. No more annual in and out.

The dock pontoons can be purchased separately or Whitewater can fabricate the dock for you.

Call your favorite Lumber yard and have the wood and hardware delivered to your waterfront.
